

#	Photo / Step + REO code + What to show	Otv / OK
1	Four finished elevations REQ_2_2_eligibility One full photo per side (N, S, E, W). Show the full roof, foundation line, and any visible vents or accessories. GPS/date stamp visible.	4 photos
2	Foundation type REQ_2_3_foundation_type Close-up of the foundation wall, slab edge, crawlspace opening, or pile/pier. Tape measure or ruler for scale.	1 photos
3	Foundation-to-wall positive connection REQ_2_4_foundation_positive_connection Anchor bolt, strap, or hold-down connecting wall framing to foundation. Hardware visible without obstructions.	1 photos
4	Roof structural members + spacing REQ_2_5_roof_structural_members Inside the attic (or from above before decking). Trusses or rafters with a tape measure showing on-center spacing.	1 photos
5	Roof deck thickness REQ_4_2_roof_deck_thickness Plywood/OSB grade stamp on the deck, OR a clear edge shot with a tape measure (typical: 7/16" OSB or 1/2" plywood).	1 photos
6	Deck attachment - nail carton label REQ_4_4_deck_attachment_cartons Nail/fastener carton or product label showing the fastener type (must be 8D ring-shank or equivalent). Label text readable.	1 photos
7	Deck attachment - installed fastener REQ_4_4_deck_attachment_fastener One photo per elevation showing an installed fastener with a tape measure alongside, demonstrating 8D minimum length and ring-shank pattern.	4 photos
8	Sealed Roof Deck - taped seams REQ_4_4_SRD_tape_seams One photo per elevation of the roof deck with all seams taped using FORTIFIED-approved seam tape. Tape visible across every joint.	4 photos
9	Sealed Roof Deck - underlayment REQ_4_4_SRD_underlayment One photo per elevation of the underlayment (self-adhered membrane, 2-ply, or spray foam per spec) fully covering the deck.	4 photos
10	Drip edge - eaves REQ_4_5_drip_edge_eaves Drip edge installed along the eave runs. Show the metal profile and the fastener pattern.	2 photos
11	Drip edge - rakes (gables) REQ_4_5_drip_edge_rakes Drip edge installed along the rake/gable edges. Show the overlap with the eave drip edge and fastener pattern.	2 photos
12	Drip edge - close-up of nailing pattern REQ_4_5_drip_edge_nailing Close-up of drip edge fastener pattern. Fasteners visible without obstructions.	1 photos
13	Roof slope measurement REQ_4_7_roof_slope Inclinometer reading, T-square on the roof surface, or a phone-app screenshot showing the rise/run.	1 photos
14	Finished roof cover - four elevations REQ_4_8_roof_cover_finished One photo per elevation of the fully installed roof cover. Shingles/panel pattern clearly visible.	4 photos
15	Shingle packaging - manufacturer + product REQ_4_8a_shingle_pkg_mfr Shingle bundle label showing manufacturer name and product line. Label text readable.	1 photos
16	Shingle packaging - ASTM rating / class REQ_4_8b_shingle_pkg_astm Shingle bundle label zoomed in on the ASTM D3161 or D7158 rating and the class (F, H, etc.). Separate close-up from the manufacturer label.	1 photos
17	Starter strip - packaging REQ_4_8c_starter_pkg Starter strip bundle label showing the product name and that it is a starter strip (not field-cut shingles).	1 photos
18	Starter strip - installed at all edges REQ_4_8c_starter_installed One photo per eave/rake direction of the installed starter strip. Adhesive strip visible.	4 photos
19	Shingle fastener - packaging + label REQ_4_8d_fastener_pkg Shingle nail/fastener carton label AND a fastener next to a tape measure showing the length (per FORTIFIED 2025 spec).	2 photos
20	Ridge vent - packaging (TAS 100(A) rating) REQ_4_8e_ridge_vent_pkg Ridge vent product packaging showing the TAS 100(A) wind-driven rain rating. Label readable.	1 photos
21	Off-ridge vents - packaging REQ_4_8e_offridge_vent_pkg Off-ridge vent (turtle, mushroom, etc.) packaging with product rating. Skip if the project uses ridge-only ventilation.	1 photos
22	Hurricane gable vent - open state REQ_4_8f_gable_cover_open Gable vent in its open/pre-cover state. Vent opening visible with no obstructions.	1 photos
23	Hurricane gable vent - cover installed REQ_4_8f_gable_cover_installed FORTIFIED-approved hurricane gable vent cover installed over the opening. Cover hardware visible.	1 photos
24	Coastal - corrosion protection REQ_4_8g_coastal_corrosion Corrosion protection measures on metal components for coastal installs within 3,000 ft. of saltwater. (Required only if coastal = Yes.)	1 photos
25	Skylight - overall view (per skylight) REQ_4_8h_skylight_overall One overall photo per skylight. Frame and surrounding shingles visible. (Required only if property has skylights.)	1 photos
26	Skylight - impact rating label REQ_4_8h_skylight_label Close-up of the skylight impact rating label (per Hail Supplement). Text sharp. (Required only if skylights.)	1 photos
